## terms used one hundred times or more

The lists herein present the terms occurring most often in the Hebrew Bible—more than one hundred times (for specifics see frequency version of these lists on ScriptureWorkshop.com). Proper nouns are presented elsewhere.

**What should the user know about the *Vocabulary Builder*?** The first lists are made up of pronouns, prepositions, particles, and the like. The remaining odd number lists present nouns and adjectives (marked as such), and the even verbs. Verb glosses usually refer to Qal root; often noted when term occurs only or primarily in a stem other than Qal. The English glosses are the most common only. In the case of two roots with the same letters a semi-colon divides the definitions. The frequencies are based on BibleWorks, and the English glosses on BibleWorks and *HALOT*.
